

Education for the World

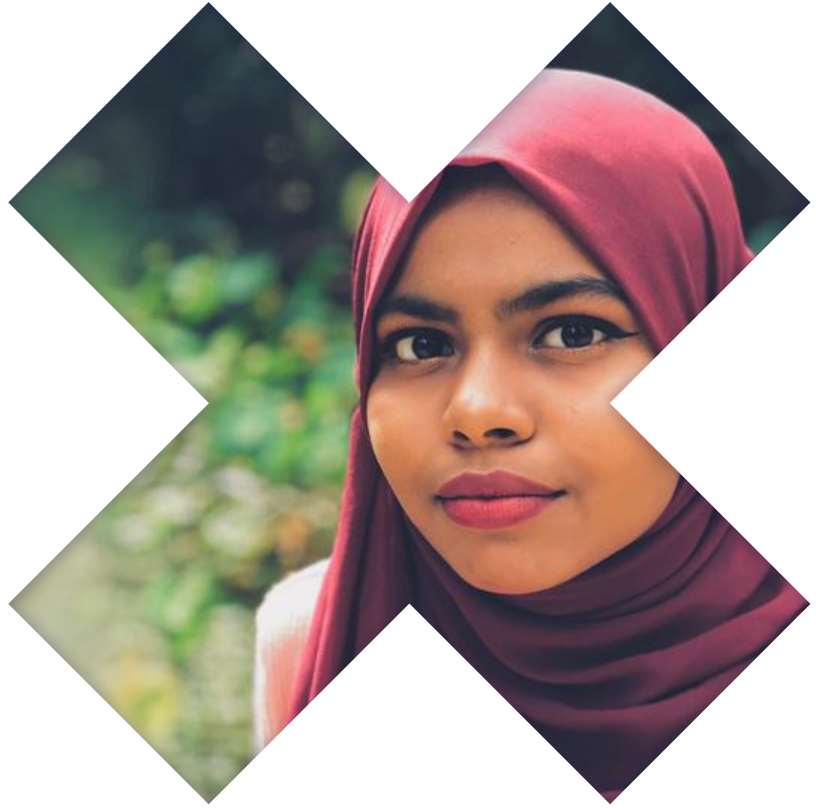

**UN Goal - By 2030,
ensure that all youth
and a substantial
proportion of adults,
both men and women,
achieve literacy and
numeracy**

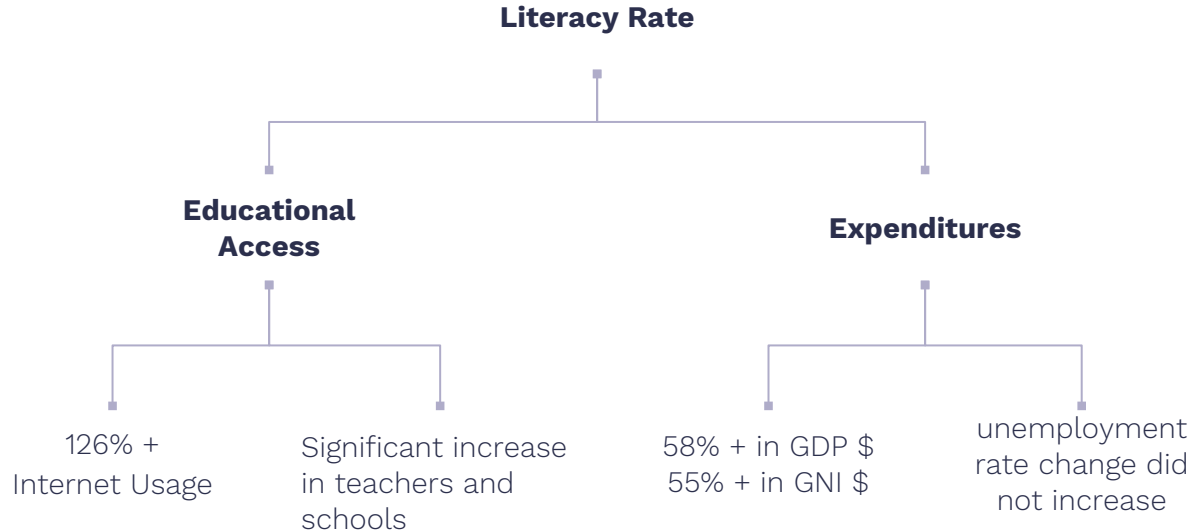

Hello!

I am Aya from Burundi

In the span of 20 years, my country had one of the lowest youth literacy rates in the world. But now, we have improved by more than 25%. Let's find out how!

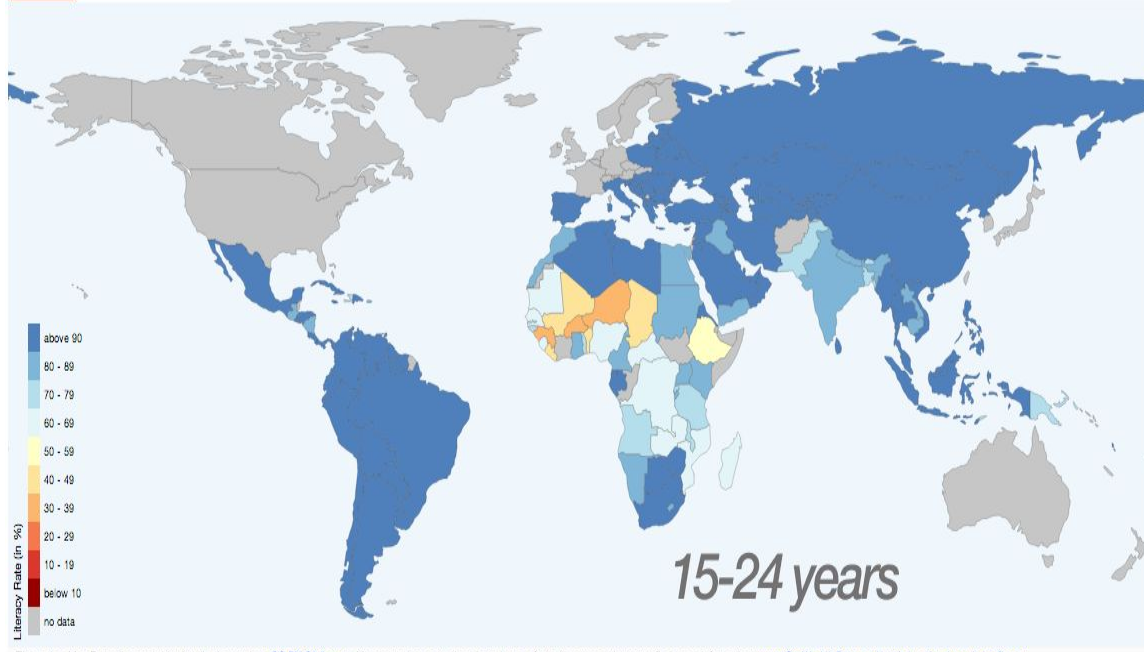

How Burundi Changed Over 20 yrs (1993- 2013) according to data

Map of countries with low literacy

Our World
in Data

Literacy Rate of the Youth (15-24 years) – Max Roser

Big Concept

The data shows that countries such as **Nepal in Asia** and **Togo in Africa** rivaled the performance of Burundi.

The diversion of funds and focus on Educational Access and Expenditures greatly improved the literacy level in low income countries.

THANKS!
